

# Eighth & Penn

Partnering with interior designer Sharon Ginocchi alongside TREK Development and Q Development, Monmade brought together a network of designers to produce custom and unique furnishings. The pieces reflect the history of the buildings that form the Eighth & Penn apartment development.

By working with Monmade and local artisan producers, tens of thousands of dollars went back into Pittsburgh's small business economy.

## Building Bytes

The building's lobby has an intricate 3D-printed ceramic wall created by Building Bytes, an award winning design and fabrication studio, that echoes existing architectural elements throughout the building.

## Pittsburgh Glass Center

Each unit in Eighth & Penn features a hand-blown pendant light created by the Pittsburgh Glass Center.

## Transit Forge

The lobby's oversized sculptural metal clock hand created by Transit Forge pays homage to the watch factory that once occupied part of the build site.

## Brian Ferrell Designs

The custom clothespin table located in the lobby was created by Brian Ferrell Designs, who also made the striking entryway sign.
